

Effisoft sponsors the 2008 Strategic RISK European Awards

Each year, Strategic RISK magazine organises an awards ceremony for European risk management professionals (European Risk Manager; European Risk Management Team; Best Loss Control Strategy; Most Effective Use Of Technology; Risk Management Product ...).

As a leading provider to the Risk Management industry, Effisoft is delighted to participate in such an event. That is why, during this evening, Effisoft presented the award to the European Business Insurer of the Year.

“On Thursday 17th April, risk managers, insurers, brokers and risk management product and service providers gathered at the Westin in Paris for the fifth StrategicRISK Awards.

The evening began with a champagne reception followed by a traditional French gala dinner. The exquisite Salon Impérial provided the perfect backdrop for the first StrategicRISK European Risk Management Awards in France.

The host for the evening was Lani Bannach, Managing Director of ScanConsult International. Lani is one of the leading figures in risk management and as chairperson of the judging panel it was wonderful to have her host the awards ceremony.”

Sponsor presentation:

Effisoft delivers software solutions to the Insurance and Risk Management industries worldwide. Our products are designed for all insurance professionals (risk & insurance managers, brokers, insurers & reinsurers).

Located in Paris, London and Boston, Effisoft has a clientele of more than 200 companies over 5 continents.

Today, Risk & Insurance managers are confronted with 2 challenges:

- the management of risk (risk mapping, prevention planning, controls, events, ...)
- the management of the insurance programme (renewal data collection, premium allocation, loss management, ...).

As such, it is essential for risk managers to have total control over the available information to enable them to manage risks and provide appropriate insurance cover within their organisation.

To help achieve this goal, Effisoft created WebRisk, a management, communication and decision facilitation software developed by Risk Managers for Risk Managers. It adapts perfectly to the needs of all organisation types and all sectors of activity.
